

This is not a turn-in assignment

Build a page with this layout:

Within the body, create a **header** tag (which stores the h1 tag)
After the header tag, create a **div** tag with the **id** “main-content”

Within the **main-content** tag, add an Unordered List **ul** with three List Item **li** items.

In the <head> tag, add the following:

```
<style type="text/css">  
</style>
```

Within the style tags, we can create our style rules.

For the **body** tag, set the background with to background-color: #0078ff
Also set the font family with font-family: “arial”

For the **h1** tag, change it to text-align: center

For the **li** tag, set the font color with color: #ff0000;

What else can you update with these tags?

- background-image
- border
- font-size
- font-style
