

CS/IT 490 WD: In-Class Practice

Build a webpage that looks like the one attached, using the following tags:

- headers
- paragraphs and line-breaks
- emphasis and strong tags
- anchor tags
- image tag
- horizontal rule tag
- table tag (and related)
- list tag (and related)

Your links don't need to go anywhere (feel free to put gibberish as a placeholder). Also note that the table in the attached preview has borders – yours will not; I simply added it to make it easier to understand what cells belonged in what column.

This assignment is for practice only, but will be helpful on assignments.

My Class Portfolio

This is a webpage where I track all of the assignments I've worked on during my time at UMKC.

Class Assignments

CS 101: Problem Solving and Programming I

Fall 2010

- [Assignment 1](#)
- [Assignment 2](#)
